

Notes: Module 2

How to Start at the Main Idea and Branch Off

Main idea or **Central** starts in the middle of your page or computer screen which is the topic or the title of the book.

Main Branches are connected to the **central idea** and display themes to a mind map like chapters in a book. □

Sub-Branches are connected to the **main branches** (chapters in a book) and contain minor and details information of the Mind Map.

A mind map is like a tree and **branches** that are going outward.□

When **branching** out from the central idea it always has to connect to each other.

If a **sub branch** is added to a branch put it at the end of the branch.
There should be one key word per branch.

The mind map should be clear and orderly.
