### COMPUTER NETWORK AND INTERNET ACCEPTABLE USE FOR STUDENTS AND STAFF

**Philosophy:** It is the philosophy of the Great Neck Public Schools that the integration of technology with the curriculum is an essential part of instruction. At the same time, there is an inherent responsibility on the part of users to conduct themselves in an appropriate and considerate manner when using this medium. The Internet contains a rich array of educational content as well as information that is illegal or inappropriate for children. Therefore, Internet resources are filtered for inappropriate content, students are educated about Internet safety and appropriate online behavior, and student use is monitored and supervised by staff. However, the security, accuracy and quality of information that is available through our network cannot be guaranteed. While the guidelines that follow have been developed to ensure responsible use of our computer network and the Internet, we respect each family's right to deny independent Internet use by their children in school.

**Parent/Guardian Option:** A parent/guardian may deny their child independent access to the Internet at any time by submitting a letter to the school. However, teacher-directed Internet activities are part of our curriculum and not subject to parent/guardian authorization.

**Internet Filtering System:** In compliance with the Children's Internet Protection Act, the District employs technology protection measures that are designed to block access to visual depictions of pornography, obscenity and other material deemed illegal, inappropriate or harmful to minors. Web site traffic passes through this filter on all Internet-enabled computers. The following procedure has been developed to customize the filter in a manner that is consistent with instructional needs and community standards:

1. Separate filters will be provided for students and staff to meet their respective educational, instructional, and professional needs while maintaining compliance with the law and this policy.
2. Technology protection measures will not be disabled for student use. Bypass accounts will be limited in scope and by location to adult-only computers. The need to use bypass accounts should be rare; therefore, they will be provided to a limited subset of users including central and building administrators, deans, and computer and library staff. Bypass accounts will be provided for the following reasons:
  - a. to conduct bona fide research for professional use;
  - b. to preview blocked Web sites to determine their appropriateness for instruction;
  - c. to investigate an issue involving the behavior, health, or safety of a student;
  - d. for other lawful reasons not otherwise prohibited by the law or this policy.

Teachers may access a bypass account through any of the users identified above. All users should be mindful of the fact that our filtering system logs all Web site activity.

3. Users can submit Web site addresses that they believe are incorrectly filtered to their school's computer specialist for review.
4. Valid requests will be forwarded to the Office of Instructional Technology for resolution.

4526/1

**Personal Security Issues:** Users should exercise discretion when sending or receiving electronic information since there is no guarantee of privacy. Online communications between staff and students pose unique learning opportunities as well as potentially negative consequences. Staff and students should always be aware that online communications can become part of the public domain and should not be considered private. They should also be aware that information stored on District equipment is subject to review.

1. Users should not share their school accounts or attempt to ascertain the passwords of others.
2. Students should never transmit personal information such as names, addresses, telephone numbers, or photographs.
3. Students should never make appointments with people they have met online without prior written authorization from both a parent/guardian and a building administrator or his/her designee.
4. Students should notify a staff member whenever they come across information that is dangerous, illegal, obscene, inappropriate or makes them feel uncomfortable.
5. Users must follow the Guidelines in the District Sponsored Internet Publishing Policy 5221 to determine whether, and under what circumstances, names, photos, videos, school work, or other student or staff content may be published on public Web sites, including social networking sites. Content of this nature cannot be published through our network or by other means without obtaining prior written authorization from the student's parent/guardian, as well as the permission of the principal or his/her designee and the staff member.
6. While the District encourages appropriate electronic communication among students, parents, and staff, staff members are advised to use discretion if making these online connections on social networking sites and should always maintain a separation between their personal lives and their professional responsibilities.

**User Guidelines:** Use of our network is a privilege to be used responsibly, fairly and appropriately. The same behavioral expectations of individuals in school and the community apply to online behavior. Users should be aware that the District maintains compliance by monitoring online activity.

1. Priority will be given to those individuals who are using the Internet for curriculum-driven and research-oriented purposes.
2. The rights of others to use our network without disruption should be respected at all times.

4526/2

3. District-owned equipment and software should be treated with care.
4. Professional use of the Internet on personal devices by staff is permitted. Personal use of the Internet is prohibited on our network. However, it is permissible for staff to use personal devices that access the Internet without going through our network, except during instructional, preparation, professional, and supervisory times as contractually defined. Students will follow the guidelines listed in the District's Electronic Communication Devices Policy 5695.
5. Staff members will be assigned District e-mail accounts for professional use.
6. Students can request e-mail access through a staff account for education-related reasons with authorization and supervision from the staff member.
7. Upon request, a high school club or activity may be assigned a District e-mail account to be used solely for the purpose of club or activity business. This account may be accessed by student designees, recommended and supervised by the faculty advisor.
8. Users may not access unmediated online communications such as message boards, chat rooms or instant messaging unless it is for education-related reasons; students must have authorization from a staff member.
9. Students may participate in classroom activities that utilize e-mail and Web 2.0 applications if a teacher initiates the assignment, proactively reviews incoming messages, and approves outgoing messages prior to transmission.
10. Users may not download or upload files unless it is for education-related reasons; students must have authorization from a designated staff member.
11. The use of the District network to purchase items or services for professional use, without appropriate supporting documentation, is prohibited.
12. Users may not attempt to gain unauthorized access to other user accounts, hack into computer systems, breach security passwords or circumvent our filter.
13. Staff members may use personal laptops or other electronic devices brought in from home to connect wirelessly to the district network only if a secure, wireless Virtual Local Area Network (VLAN) has been established in that school. Staff members using personal laptops or other electronic devices in this manner must sign a "Wireless VLAN Authorization Form" (4526-E), agree to the terms, conditions, responsibilities, and liabilities for such use, and abide by this and other district policies as well as applicable local, state and federal laws.
14. Users may not physically or wirelessly connect unauthorized equipment of any kind to our network. Any such equipment, if found, will be removed immediately by district staff for network security reasons and reported to the Technology Director and Building Principal.

4526/3

**Ethical and Legal Considerations:** Use of our computer network must conform to District policies and local, state and federal laws. The following are prohibited:

1. Use of our network to access, store, distribute or promote illegal activities, obscenity or any other material deemed inappropriate or harmful to minors.
2. Use of our network to install, use, store, duplicate or distribute personal software or copyrighted materials without the license to do so, including software, files, video clips, photographs, graphics, text, music, or speech.
3. Use of our network to transmit computer viruses.
4. Use of our network to plagiarize, in part or whole, the intellectual property of others, including the work of fellow students or any published content whether in print or electronic format.

**Consequences of Violations:** The consequences for violating this policy will be consistent with other District policies and may include the following:

1. Notification of school authorities.
2. Notification of parent/guardian.
3. Suspension of access to the computer network and the Internet.
4. School consequences consistent with the Code of Conduct Policy 5300.
5. Financial restitution.
6. Legal action.

**Staff Responsibilities:** In order to comply with the provisions of this policy and the Children's Internet Protection Act, building principals will inform staff members to:

1. Educate all students about the guidelines contained in this policy and supervise and monitor their online activities.
2. Take reasonable measures to prevent students whose parent/guardian has denied permission from engaging in independent Internet activities.
3. Take appropriate disciplinary actions when students violate this policy.

4526/4

4. Report serious policy violations to an administrator.
5. Report illegal, obscene, or inappropriate information to the Office of Instructional Technology.
6. Never facilitate collection of private information about students by any Web site.
7. Contact an administrator when inappropriate student use of the Internet outside of school comes to their attention so that the matter to be investigated, and appropriate, and appropriate action may be taken to minimize disruption to the educational environment and ensure the safety and well being of children.

All of the above notwithstanding, parents are ultimately responsible for the appropriate behavior of their children when using computers or personal communication devices outside of school and should address any misuse or misbehavior.
