

Our project demonstrates at least 3 transformations. The burgers and soda are dialated and reflected. The lightning bolts have been rotated and reflected. There are squares as ice cubes, circles as sesame seeds, and red triangles by the Lipperas sign.

[redacted] & KETURA DELISCA'S

DESCRIPTION

The first thing we did was make our Lippera's logo as a pizza. The shapes we used are circles, triangles, and partial circle. We colored the lines of the shapes multiple colors. We rotated the pizza 180°, and then reflected it over the y-axis. After that, we dilated the pizza by $\frac{1}{2}$, and then we took the dilated pizza and reflected it over the y-axis. Next we took the dilated pizza and rotated it 180°.

To get the different colored pizza, we reflected it over the x-axis and colored it differently. Then, we dilated the pizza by $\frac{1}{8}$. After that we made a sign in the middle of the logo that said "Lippera's" in rainbow and made a rectangle around it.
